About

Good day! My name is Johnlord T. Mique, a 21-year-old Diploma IT student and a solo developer with a strong interest in building practical, user-focused systems. I actively work with modern technologies such as Nextjs, MERN stack, and tools and services like Supabase and Redis for backend development and data management. I'm also exploring cloud computing, DevOps and system design. I aim to become a highly skilled software engineer and contribute to building impactful and scalable applications.

Education

Don Bosco College - Canlubang

Undergraduate

Diploma Program in Information Technology

GPA: 1.43

High School

Capalonga Parochial School

2016-2022

Personal Projects

Parents Portal Management System

Tech Stack: React, Node+Express, Redis, MySQL

A full-stack school management platform designed to connect schools and parents. It provides an easy way for parents to stay updated with their child's academic life while giving administrators powerful tools to manage attendance, grades, class schedule, events, and direct communication with parents.

This is my first full-stack project from scratch, where I applied the knowledge and skills I gained from my full-stack development course and online resources, including frontend development, backend APIs, database design, and system integration.

Student Violation Tracking System

Tech Stack: React, TypeScript, TailwindCSS, Shadcn-UI, Node+Express, MongoDB

A full-stack school platform for managing and monitoring student violations.

The system allows administrators to record and view student violations while providing a detailed profile for each student.

AIInterview — A Job Interview Preparation Platform

Tech Stack: Next, Firebase, TailwindCSS, Vapi AI, Shadcn-UI, Google Gemini, Zod

A job interview preparation platform powered by Vapi AI Voice Agents and Google Gemini.

It is designed to help job seekers practice real-time AI-driven interviews and get instant feedback.

WorkspaceOS — A SaaS Workspace Dashboard

Tech Stack: Next, TailwindCSS, Supabase, Shadcn-UI, Recharts

A complete SaaS application that showcases production-ready patterns including Row Level Security, Server Actions,

optimistic UI updates, real-time activity tracking, and multi-tenancy.

Skills & Interests

Hard Skills (Technical):

- **Frontend:** HTML5, CSS3, TailwindCSS, JavaScript, TypeScript, React, Next
- **Backend:** Node, Express, Next
- **Database:** MySQL, MongoDB, PostgreSQL, Supabase (**BaaS**), Firebase (**BaaS**), Prisma (**ORM**), Redis (**Caching**)
- **Devops & Cloud:** Vercel, Render, Docker, CI CD Workflow with Github actions. Basic understanding of AWS services— EC2 and S3.
- **AI Productivity & Development Tools:** Cursor, v0, Lovable, ChatGPT, Claude

Soft skills:

- Problem Solving
- Time Management
- Creativity
- Communication

Language:

- Filipino
- English

Hobbies:

- **Chess**
 - Achievements**
 - Calambalympics 2024 First Placer
 - Arena Candidate Master Title
- **Gym**
- **Arts**

Certifications

Earned certifications in programming (C++, Java, JavaScript, Python), database management (SQL), and modern web development, including Full-stack Development (HTML, CSS, JavaScript, React, Node.js, Express.js, MySQL), Next.js, TypeScript in React, Software Engineering, and Generative AI (2024–2026).
